

UBIQUITOUS COMPUTING ASSIGNMENT

Name : Navaneeth Chandrasekaran
Uml-ID : 01704544
Topic : Kick-off event summary
Assignment No. : Week 2

My Table concept: **Innovation Technology**

- Members: Yonnie, Ganesh Ramani, Wei Wang, Vivien Chow. (I can hardly remember only few names.)

Summary of the Discussion:

Students living on Riverview suites on South campus usually sprint for the bus across the parking lot at least once a week for the bus, which usually drove away. We started thinking of finding a solution to this problem.

Key Notes of the problem:

- Getting to class on time using shuttle.
- Giving solution to Students getting left behind by bus/shuttle.
- For the students living on campus as well as students going from campus to campus.
